PROJECTS

AI-Powered Code Auditor & Documentation Suite [GitHub ↗]

- Built an AI-powered code audit platform using **React18** and **FastAPI** processing 1,000+ LOC in under 15s; reduced manual review cycles by **40%** across Python, Java, and JavaScript codebases.
- Designed an asynchronous backend pipeline to analyze source code and generate documentation in **under 3 seconds** for medium-sized codebases.
- Built an IDE-like interface using **Monaco Editor**, enabling real-time syntax highlighting and diff visualization for **100+ test cases**.
- Generated high-fidelity PDF audit reports using **jsPDF** and **html2canvas**, supporting consistent documentation across **multiple programming languages**.

EcoTrade – B2B Carbon Marketplace

- Developed a secure CSR credit ledger with **SHA-256 verification**, ensuring **100% tamper-resistant** tracking of carbon credits.
- Built a full-stack B2B marketplace using **React** and **MongoDB Atlas**, supporting real-time analytics and transaction monitoring.
- Implemented secure B2B authentication using **Clerk**, improving access control and reducing unauthorized access risks.
- Automated compliance workflows by generating PDF certificates and admin dashboards, reducing manual reporting effort by **50%** for CSR audits and CO₂ tracking.
